SUMMARY: With **2+ years of experience** in software development, full stack development, I build scalable and high-performing applications. My hands-on experience across **AWS, Front end tech stack like React.js, HTML, CSS**, combined with industry certifications, enables me to deliver reliable, efficient solutions across modern technology stacks.

EDUCATION

New York Institute of Technology <i>Master of Science, Computer Science (GPA: 3.49/4.0)</i>	Sep 2023 - May 2025
Vignana Bharati Institute of Technology <i>Bachelor of Technology, Electronics and Communication Engineering</i>	July 2017 - July 2021

PROFESSIONAL EXPERIENCE

Adjunct Professor New York Institute of Technology - Taught Introduction to Computer Science and Artificial Intelligence, covering Python programming, algorithmic thinking, and foundational AI concepts. Emphasized hands-on problem solving and real-world examples to build strong computational skills. - Instructed Computer Programming courses focused on Java, including object-oriented programming, control flow, and debugging techniques. Reinforced learning through structured labs, coding assignments, and practical exercises. - Led Web Development courses teaching HTML, CSS, and JavaScript, enabling students to build responsive and interactive websites. Focused on clean code practices, front-end fundamentals, and usability principles. - Designed and assessed assignments, labs, and projects aligned with course outcomes and industry-relevant skills. Managed grades, attendance, and student performance records using Microsoft Excel.	Sep 2025 – Present
Local Grown Salads Full Stack Developer Intern - Developed end-to-end web applications, contributing to both front-end (UX/UI) and back-end logic and architecture for scalable systems. - Built and integrated RESTful APIs using Flask and JSON, applying object-oriented programming and clean code principles for maintainability. - Mapped Python objects to PostgreSQL tables using ORM, for relational data modeling and eliminating raw SQL queries and improving code modularity, readability, and long-term maintainability across backend systems.	June 2025- Present
Sub360 Inc. Data Analyst Intern - Analyzed hiring vacancies, time-to-hire, and recruitment performance metrics. - Built and maintained Power BI dashboards for workforce and hiring analytics. - Managed accurate hiring data, documentation, and compliance reporting. - Supported HR operations, reporting, and cross-team coordination.	May 2024 - Sep 2024
Epam Systems Software Test Automation Engineer - Automated functional, regression, integration, and UAT testing for HRIS applications using UI and API automation frameworks, reducing manual testing effort by 50% and improving release quality. - Designed and maintained reusable test scripts, datasets, and test plans using Selenium (Java), Cucumber (BDD), TestNG, TestRail, and Jira, accelerating development velocity by 35%. - Integrated automated test suites into Jenkins CI/CD pipelines, diagnosing and resolving build failures to reduce flakiness and improve overall system stability. - Performed REST and SOAP API testing and performance validation using Postman, REST Assured, JMeter, and BlazeMeter, reducing production defects by 30–40%.	Jul 2021 - Aug 2023

TECHNICAL PROJECTS

NutriLite Calorie Count: Developed a full-stack nutrition tracking web application that integrates real-time USDA food data to log meals, track calories and macronutrients, and analyze daily nutrition trends through an intuitive React interface.
ClickAble Built an accessibility-focused learning platform featuring voice-assisted navigation, speech synthesis, and keyboard-friendly interactions to improve usability for visually and cognitively diverse users.
Twitter Sentiment Analysis Implemented a data analytics pipeline to analyze and classify Twitter sentiment using machine learning techniques and presented insights through interactive Power BI and Tableau dashboards.
CompareHub Created a scalable product comparison platform enabling users to compare prices, ratings, and offers across multiple online retailers using a high-performance Go backend and a responsive React frontend.

SKILLS

- Back-End, Cloud & DevOps:** Node.js, RESTful APIs, MySQL, PostgreSQL, NoSQL, Spring Boot, Go (Golang), Kotlin, CI/CD, Jenkins, Docker, Kubernetes, Maven, GitLab, GitHub, JIRA, Cloud Deployment (AWS), DevOps Practices, System Architecture
- Programming & Front-End:** JavaScript (ES6+), React.js, TypeScript, HTML5, CSS3, Bootstrap, Python, Java, C++, C#, PHP, Vite, Accessibility (ARIA/WCAG)
- Testing, Automation & QA:** Selenium, TestNG, Cucumber (BDD), JUnit, TDD, Appium, Postman, REST Assured, JMeter, Jest, React Testing Library, API Testing, Performance Testing
